LOCHSIDE AVENUE**

Let there ————— be Light

Highly flexible, light flooded floor plates allow for multiple configurations to suit individual working requirements while at the same time delivering inspiring, panoramic views of the surrounding area.

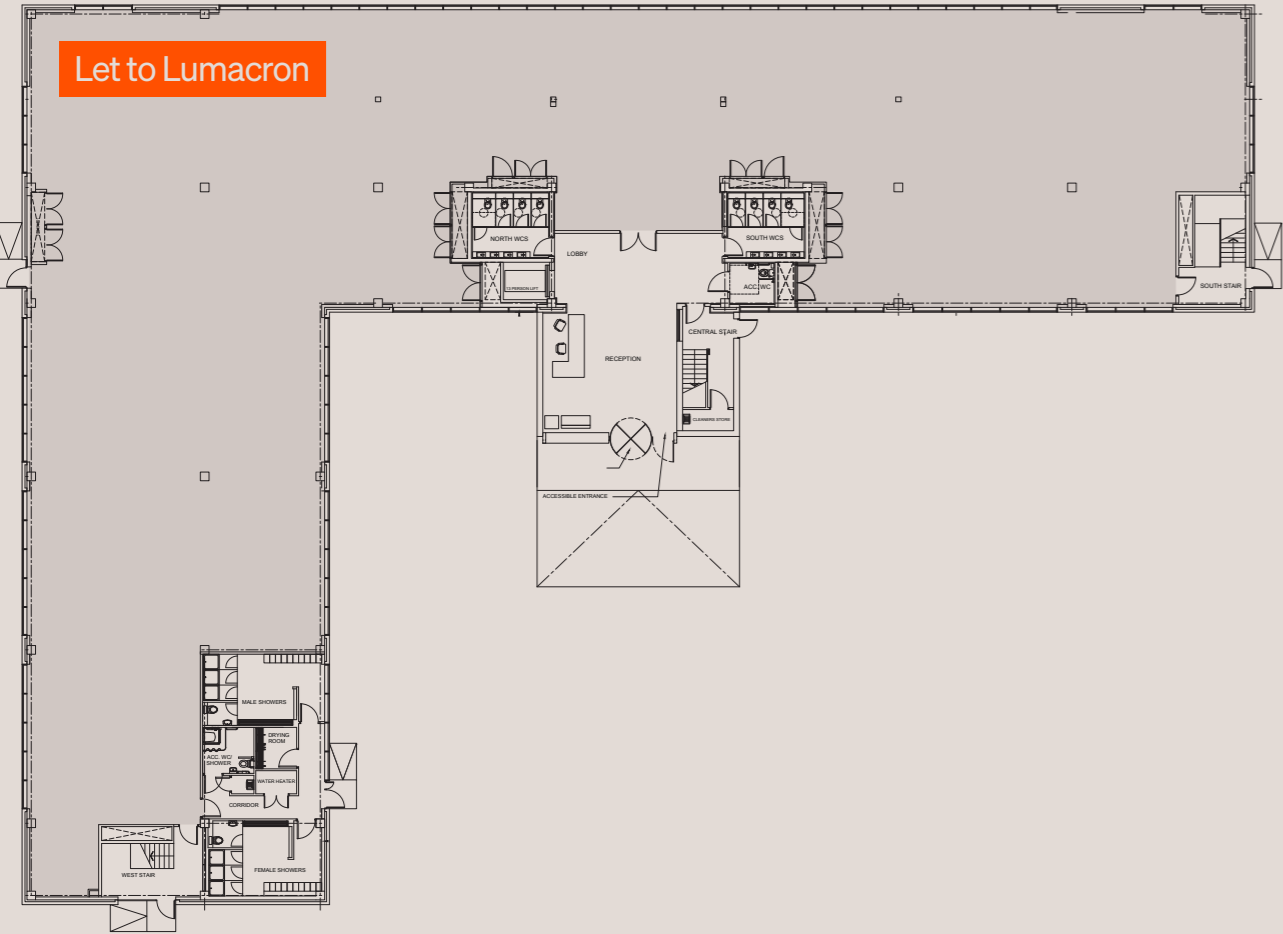

FOUR — FIVE  
LOCHSIDE AVENUE

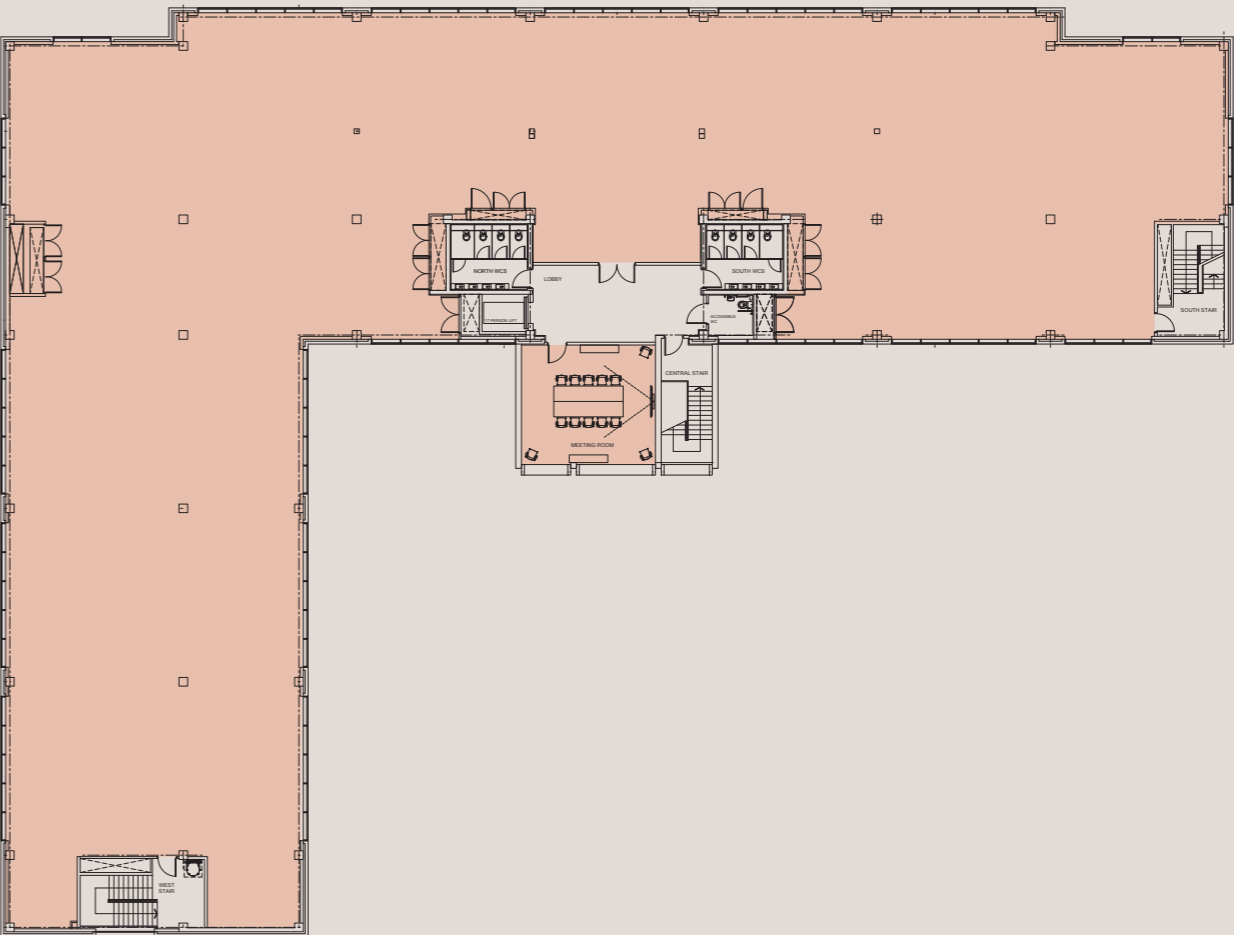

Floor	Sq ft	Sq m
Second	14,849	1,379
First (North Wing)	Let to Pulsant	
First (South Wing)	4,724	439
Ground	Let to Lumacron	
Reception	465	43
Total	42,996	3,993

First Floor  
14,868 sq ft / 1,381 sq m

Ground Floor  
12,814 sq ft / 1,190 sq m

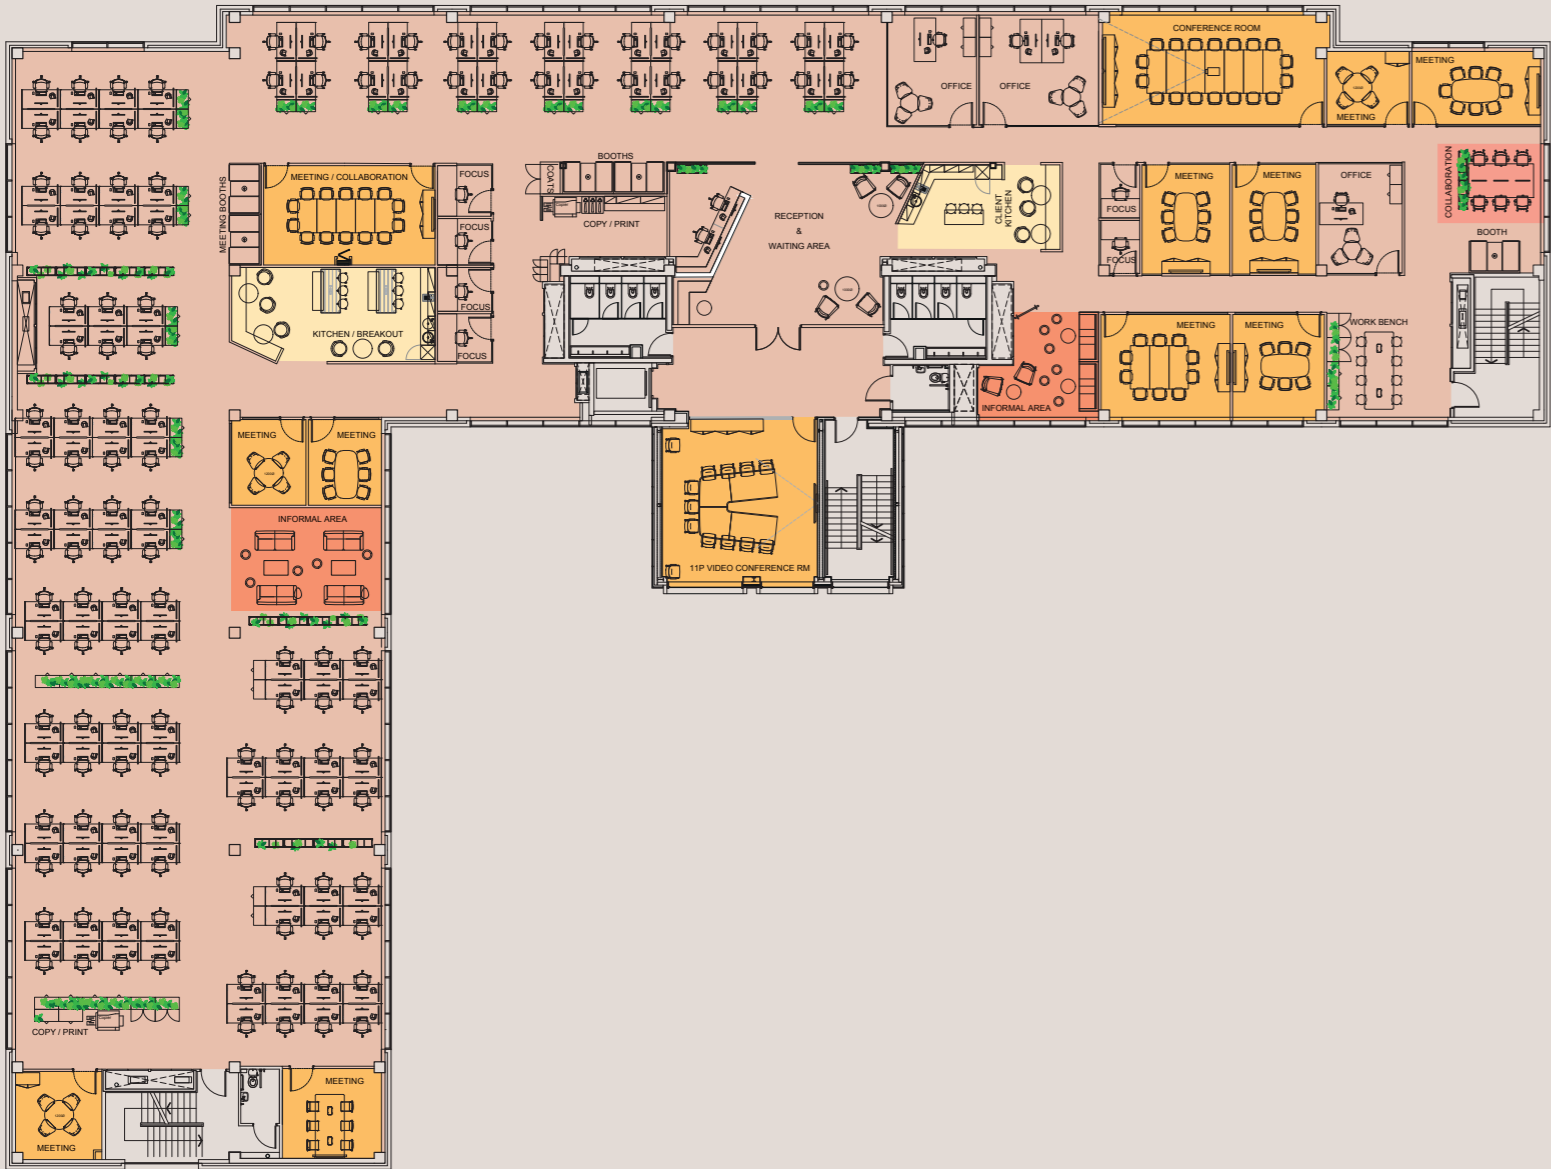

Second Floor  
14,849 sq ft / 1,379 sq m

High Density Space Plan

High density layout :  
Occupancy area - 1,358 sq m / 14,617 sq ft  
= 10.8 sq m / 116.0 sq ft per person

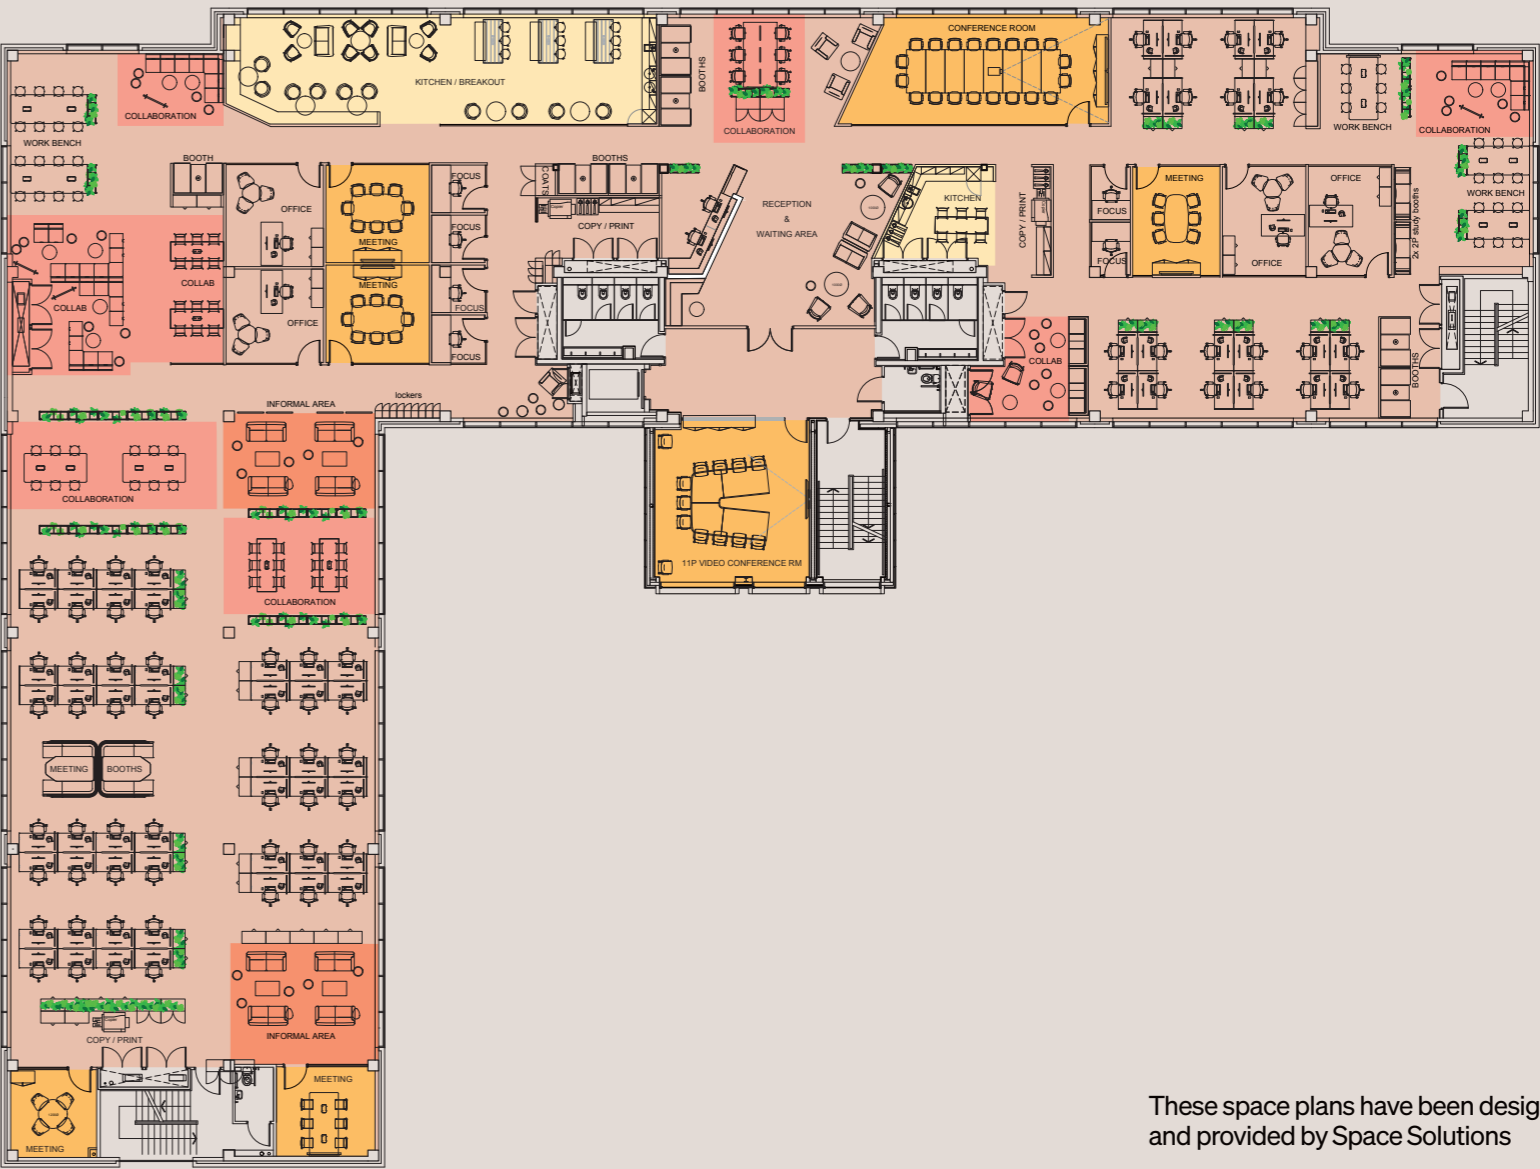

Proposed floor layout	3 x	4 person meeting room
126 x Open plan	5 x	6 person meeting room
2 x Single office	1 x	8 person meeting room
1 x Double office	1 x	11 person video conference room
	1 x	16 person meeting room
		(with foldable partition)
	1 x	14 person meeting room
	1 x	18 person conference room
	6 x	Focus room
	2 x	Informal meeting area
	2 x	Workbench / collaboration area
	5 x	4 person meeting booth
	1 x	Reception & waiting area
	2 x	Copy / print
	1 x	Staff kitchen / breakout
	1 x	Client kitchen / breakout

Low Density Space Plan

Low density layout :  
Occupancy area - 1,358 sq m / 14,617 sq ft  
= 19.4 sq m / 209.6 sq ft per person

Proposed floor layout	1 x	4 person meeting room
70 x Open plan	2 x	6 person meeting room
4 x Single office	2 x	8 person meeting room
	1 x	11 person video conference room
	1 x	18 person conference room
	6 x	Focus room
	2 x	Informal meeting area
	10 x	Workbench / bench seating collaboration area
	4 x	Soft seating collaboration area
	9 x	4 person meeting booth
	2 x	2 person study booth
	1 x	Reception & waiting area
	3 x	Copy / print
	2 x	Kitchen / breakout

FOUR ——— FIVE  
LOCHSIDE AVENUE

# TAKE A BREATH

Take in the fresh air in  
the lush, green environment  
that is Edinburgh Park.

# RUN FOR IT

An environment that allows staff  
wellness and welfare to be central  
to every decision.

# CAPITAL COOL

Voted one of the top 20 cities worldwide for  
wellbeing in 2020, Edinburgh boasts world  
class festivals, a global food scene and a strong  
educational heritage with 42% of graduates  
choosing to remain in the city.

# HOP ON

Drive, cycle, bus, tram, run?

You choose how you get to  
Edinburgh Park.

# MEET & EAT

Edinburgh Park offers a wide variety of  
amenity giving you a wealth of lunchtime  
eating options.

The attractiveness of Edinburgh Park as a place to work will shortly be further enhanced by Parabola's new mixed use community, the first phase of which is currently under construction. Located just minutes walk from Four - Five Lochside Avenue, the development will feature new office buildings, 1,800 diverse and affordable homes, an art trail and new civic square lined with restaurants, bars and shops. Other attractions include a lido swimming pool, gym and a 150 seat venue that will host events and exhibitions. The aim is to create a 24/7 active, healthy and vibrant location where people can live, work and have fun.

Creating a sustainable community

**FOUR — FIVE  
LOCHSIDE AVENUE**

Scotland's capital city with a population of 524,930. Home to the Scottish Parliament and the heart of the Scottish legal system

Over 50% of working age residents educated to degree level or above

The city has a strong educational heritage boasting 6 universities and 3 colleges

Home to the National Museum of Scotland, the Scottish National Gallery, the Scottish National Portrait Gallery and the Scottish National Gallery of Modern Art

The city attracts more overseas visitors per year than any other UK city outside London

The UK's second largest and Europe's fourth largest financial centre

In March 2020 Edinburgh was voted one of the top 20 cities worldwide for wellbeing based on factors such as happiness, healthcare and access to green spaces

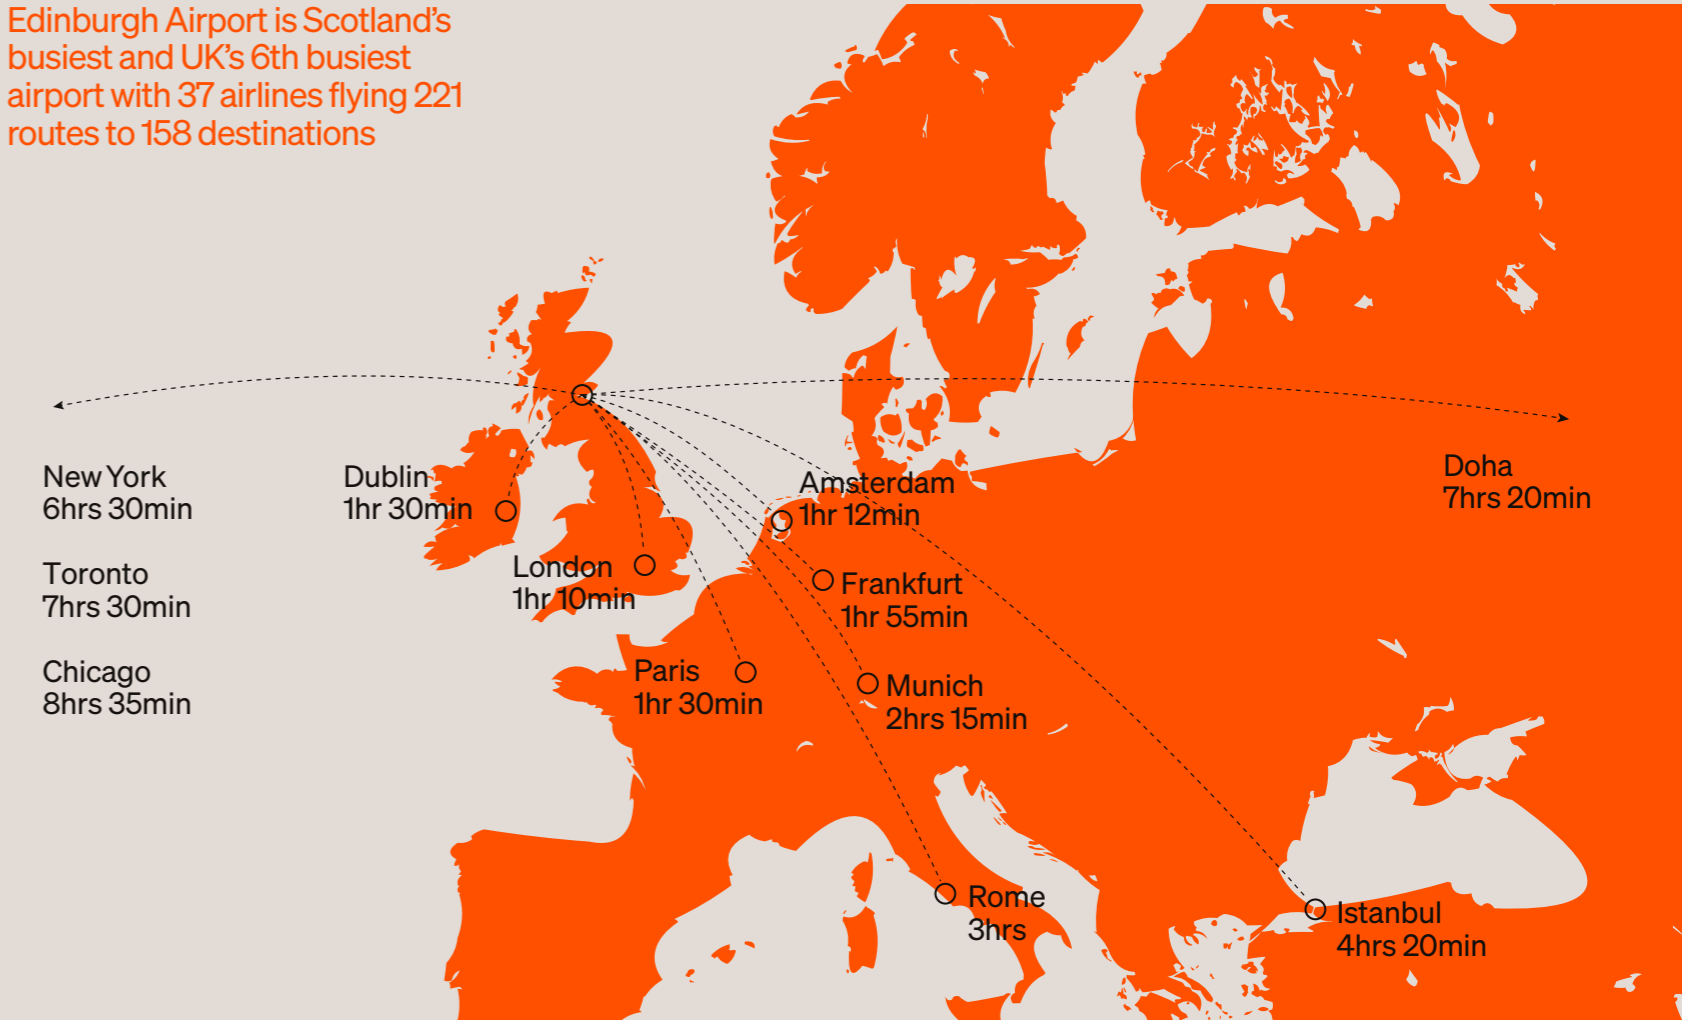

Edinburgh boasts more green space than any other UK city

Home to the world famous Edinburgh International Festival and the Edinburgh Festival Fringe along with a myriad of additional festivals

Edinburgh Airport is Scotland's busiest and UK's 6th busiest airport with 37 airlines flying 221 routes to 158 destinations

WHETHER YOU NEED TO HOT FOOT IT TO CATCH A TRAM, TRAIN OR BUS OR ARE ADOPTING A HEALTHY COMMUTE ON FOOT OR BY BIKE THEN YOU HAVE EVERYTHING YOU NEED AT YOUR SERVICE.

Edinburgh Park benefits from its own dedicated tram stop, Edinburgh Park Central, linking the city centre and nearby Edinburgh Airport. Additionally two train stations and multiple bus routes also service the Park. National Cycle Routes 8, 75 and 754 run close by and for those commuting by car, Edinburgh Park offers immediate access to the City Bypass (A720), which in turn connects with the M8, M9 and M90.

Detailed Specification

DESIGN STANDARDS  
The alteration and refurbishment of the building is designed to comply with the requirements of the Building (Scotland) Regulations 2004 as amended in October 2019 and is informed by the British Council for Offices (BCO) Guide to Specification 2019.

ENERGY PERFORMANCE  
The property has achieved an EPC rating of A+.

BUILDING EXTERNAL FABRIC INSULATION  
The new extension has been designed to the following U value standards in compliance with the current Technical Standards:

- External walls 0.21 W/sq m K
- Glazing and doors 1.4 W/s qm K
- Ground floor 0.2 W/s qm K
- Roof 0.15 w/s qm K

SUPERSTRUCTURE  
The building comprises an 'L Shaped' 3 storey reinforced concrete structure. The ground floor slab is a combination of a 150 mm thick ground bearing slab on 200 mm of hardcore and a precast suspended slab 250 mm thick including structural topping.

The superstructure comprises of reinforced concrete frames at 6.0 and 9.0 m centres supporting a combination of 150 mm/250 mm thick precast suspended slabs at first and second floors and 200 mm/300 mm thick precast suspended slabs at third floor.

The plant room is situated on the roof of the 3rd floor.

The new extended floor slabs are composite concrete 'holorib' slabs on steel frame.

IMPOSED FLOOR LOADINGS  
The office floor slabs are designed to accommodate the following uniform imposed load:

Live load	4kN/sq m
Partitions	1kN/sq m
Ceilings and services	0.5kN/sq m
Raised floor	0.5kN/sq m
Plant room (enclosed)	7.5kN/sq m
Plant room (open)	5.0kN/sq m
Other areas for access	1.5kN/sq m

SPACE HEATING & COOLING  
High efficiency heat recovery VRV/VRF system in the offices.  
The system provides heating and cooling in the open plan office areas with plant having +20% spare capacity in order to suit the fit out.

VRV/VRF is also provided in reception, lift lobbies, and meeting rooms.

External Design Temperatures:-  
Winter: - 5 °C db 100% RH (fabric), - 8 °C db 100% RH (air systems)  
Summer: 24 °C db, 20°C wb

Internal Design Temperatures:-  
Office Areas/Reception/ 20 °C db 32 °C db Winter  
Lobbies/Meeting Rooms 23 °C db 32 °C db Summer

VENTILATION  
Two packaged air handling units within the internal plant room for fresh air provision. 100% fresh air introduced to the building via ductwork within the sealed pressurised floor void.

Mechanical extract from toilets & shower/changing facilities - make-up air via natural air transfer from adjacent areas.

Fresh air provision provides 1.6 l/s/sq m (12 l/s/p based on 1/8sq m) with plant having an additional 10% spare capacity.

AUTOMATIC CONTROLS / BMS  
BMS system provides control and/or monitoring of:

- Air handling units
- Toilet extract fans
- Cold water booster pumps and break tank
- Domestic hot water plant
- Water sub-meters

VRF systems provided with central intelligent master controllers on each office floor with local user controllers installed in each zone.

VRF systems interfaces with BMS to provide common fault signals.

POWER INSTALLATIONS  
External substation provides the main LV supply to an MCCB switchboard located in an adjacent external enclosure.

The MCCB switchboards serve the building and car park.

The distribution strategy allows for dual tenancy occupation within each floor. Split way lighting and power tenant distribution boards, comprising lighting and small power final circuits have been provided in each electrical services riser on all floors. All tenant DBs are metered to enable independent monitoring of the general lighting and small power usage.

All electrical meters are connected to the BMS system to enable central data collection and billing.

A minimum of 25% spare ways have been provided in all tenant final circuit distribution boards to suit future tenant fit outs. Allowance of 25W/sq m in DBs / infrastructure to suit future tenant fit outs.

Final circuit distribution boards complete with metering have been provided for the landlord services.

GENERAL & EMERGENCY LIGHTING  
Suspended linear LED fittings are provided throughout the office in compliance with LG7 standards. Prospective tenants will be able to adjust the locations of the light fittings to suit their fit-out design (partitions, etc.) and to provide additional lighting as required to suit their office layout.

A fully networked lighting control system has been provided throughout the building comprising of presence/daylight sensors throughout the office to allow for daylight dimming and for dimming fittings where there is no occupancy detected. The lighting control system is sufficiently flexible to enable adjustments as required during the operation of the building and to allow the future integration of cellular offices.

An emergency lighting installation has been provided throughout in compliance with BS 5266-1 for a three-hour non-maintained system.

LIFT INSTALLATION  
1Nr 15-person passenger lift provided.

PROTECTIVE INSTALLATIONS  
Door access system is provided to the main reception entrance, the entrance to the male and female showers, the bike shed, the meeting rooms and the 3rd floor plant room. Handset receiver provided at the reception, which links to the car park entrance gate and main entrance side door, cabling provided within each office floor for the potential installation of handset receivers.

CCTV cameras provided to cover the external areas of the building, the main reception, the bike shed. CCTV equipment is power over ethernet (PoE), with the equipment and recording device located within a comms rack on the third-floor plant room. CCTV viewing is via display screen at the reception desk.

An intruder detection system is installed, with door contacts to the ground floor doors and PIR detectors.

LOW CARBON & SUSTAINABLE DESIGN  
The following low carbon and sustainable technologies are provided:

- High Efficiency Heat Recovery VRF Heat Pump Systems
- AHU-Plate Heat Exchanger
- LED lighting
- PV for electricity generation
- 11 dedicated electric vehicle charging points
- Electric supply – 100 % renewables source

RECEPTION  
Walls - Paint finish generally, with a slatted timber veneer feature panelling behind the reception desk and a smaller section of slatted panelling on the opposite wall.

Floor - Tiled barrier mat entrance. Slip resistant vinyl sheet floor finish generally.

Speed gates installed at reception, 1 x disabled gate, 2 x standard gate.

Ceiling - Grey paint finish to exposed metal composite decking with exposed services and feature suspended halo lighting.

Reception desk - Two-person desk with timber finish generally and Corian or similar finish to elevated central section.

LIFT LOBBIES  
Walls - Paint finish generally.

Floor - Slip resistant vinyl sheet to ground floor, and carpet tiles to upper floors.

Ceiling - Grey paint finish to exposed metal composite decking suspended timber slatted raft and integrated linear lighting.

Doors - Toilet doors have horizontal grain oak veneer finish.

Lift doors have black colour coated metal finish.

Suite entrance doors have solid timber veneer finish.

Suite doors have electro-mechanical locking with card reader on lobby side.

CORE TOILETS  
Walls - Full height ceramic tile finish generally, with areas of mirror.

Floor - Ceramic floor tile.

Ceiling/soffits - Painted finished plasterboard with recessed linear light over vanity unit and recessed spotlights elsewhere.

Cubicles - Laminate faced cubicle system and matching IPS panelling.

Sanitaryware - Floor mounted back to wall WCs with brushed stainless-steel manual dual flush buttons set into IPS.

Doc M sanitaryware and grab rails in accessible toilet.

Solid acrylic trough WHB unit with sensor operated brushed stainless-steel taps and soap dispensers.

Fixtures and Fittings - Mirror over WHB unit, spur point for future installation of electric hand drier.

SHOWER / CHANGING AREA  
Walls - Painted plasterboard generally, except where noted.  
Full height ceramic tile finish within shower cubicles.  
Full height ceramic tile finish within accessible toilet/shower.

Floor - Raised access sub-floor generally, with screed on built up insulation within shower cubicles and accessible toilet/shower.  
Slip resistant vinyl sheet floor generally.  
Slip resistant vinyl sheet floor finish to drying room.  
Slip resistant ceramic floor tile within shower cubicles and accessible toilet/shower with flush shower trays.

Ceiling/soffits - Paint finish plasterboard with recessed spotlights.

Cubicles Wall - Construction sides with solid grade laminate fronts and doors. Matching IPS panelling within WC cubicles.

Sanitaryware - Floor mounted back to wall WCs with brushed stainless-steel manual dual flush buttons set into IPS.

Matching WHBs with tiled splashbacks and wall mounted mirrors.

Doc M sanitaryware and grab rails in accessible toilet.

Recessed thermostatic shower valves with wall mounted rain heads in general shower cubicles and DDA compliant shower.

Head, rail and seat in accessible shower.

Fixtures and Fittings  
Laminate finish vanity shelf and wall mounted mirror in each changing room.  
20 Z style lockers in each changing area with metal bodies and solid grade laminate doors.  
Shower rail and curtain in accessible shower.  
Wall mounted soap dispensers.

TENANT FLOOR SPACE  
Walls - Existing wall linings plaster skimmed and white paint finish applied generally.

Where required, existing timber/MDF skirtings have been renewed, and all skirtings re-finished.

Columns - All existing concrete columns have been painted black.  
All new steel columns painted in 1-hour intumescent paint and boxed in non-fire rated plasterboard.

New exposed steel beams painted black to match ceiling in 1-hour FR intumescent paint.

Floor - New raised access flooring. Air distribution grilles replaced throughout the floors.

Ceiling - Grey paint finish to exposed soffits including existing precast concrete slabs and new metal composite decking. Exposed services and suspended linear light fittings.

Riser Doors - New doors are paint finish timber with butt hinges and eurocylinder locking.

BIKE STORE  
Cycle storage - A new enclosed, secure cycle store for 60 cycles has been installed at the front of the building. The new cycle store incorporates lighting and card operated door security.

TELECOMMUNICATIONS  
BT, Vodafone and Virgin media ducts and fibre located adjacent to the property. Spare ducts installed to north and central risers.

Secured 3 star eWave telecommunications rating. Full report available upon request.

SERVICING AND WASTE  
A 23 sq m waste storage enclosure is located near the building.

Superior quality finishes throughout

Sensor operated brushed stainless-steel taps and soap dispensers

20 Z style lockers in each changing area

Speed gates installed at reception, 1 x disabled gate, 2 x standard gate

Suspended linear LED fittings

11 dedicated electric car charging points

Recessed thermostatic shower valves with wall mounted rain heads

Touchless entrance and quality service at the manned reception
